Food for Thought

You Tube Video's

Don't believe everything you read on the internet. The Holocaust never happened, whites are better than Afro-Americans, and political candidates will reduce taxes.

You Tube Video's are a great source of information. I have to qualify this now. They are a great source of information, but also mis-information and danger.

There has been some discussion on WoW (World of Woodturners Web Site) on you tube. Anyone can make a You Tube video about anything and post it. The one I like is the guy that is demonstrating some device and it blows up in his face and he continues as if he really has a clue as to what he is doing.

Be careful when watching the You Tube videos. Watch them critically. Try and understand what he/she is doing and if it works for you or maybe you can accomplish the same outcome with a different procedure. Most important, is the procedure being done safely? I turn very fast, and it works for me, but I don't really recommend it for anyone else because it can be and is dangerous.
